HONORS & AWARDS

2020: Varsity College Academic Achievement

2021: Varsity College Academic Achievement

OBJECTIVE

I am a highly focused, principle-based, and goal orientated person when it comes to my work in software and programming. I always strive to achieve the best results and deliver the best work I possibly can without ever shying away from a challenge and will always be open to any opportunity whereby I can learn and further increase my skills.

I have always had a passion for computers, and I fell in love with software development and programming the moment I started. I am excited to start my career in the world of software development while also developing the skills I have learnt throughout my university studies.
